Our hosting package provides:

- Plesk Control Panel, accessible on each domain at admin and individual user levels – enabling users to set up their own email accounts
- 4PSA Clean Server – automatic virus protection (customer level virus protection such as Norton or McAfee is still recommended – we are not responsible for viruses)
- 4PSA SPAM Guardian – default protection for each email account, but is configurable on a domain and user level to allow black-listing and white-listing and individual levels of spam filtering
- 24/7 access to tech support with 2 hour response time on phoned-in emergency requests
- Up to 2 GB of server space on our server's 250 GB hard drive (additional space is available if needed)
- Up to 10 domain aliases
- 1 FTP account
- Up to 50 POP email addresses
- Unlimited email aliases
- Web mail access for each email account
- Real-time access to advanced Web stats
- PDF version of each domain's stats emailed out each month automatically
- CGI bin access
- PHP and mySQL database access
- Protected directories can be set up to be accessible by username/password
- Free content management application upon request
- **No set-up fee**
- **Up to 30 minutes of free Web updates and/or tech support per month (no roll-over)**

\$40 / month (billed annually at \$480)

**Domain Name Registration = \$30 / year
(domain names reserved 2 years at a time)**
